Profile

I'm ready and looking for the right team to grow with long-term. My abilities in multiple localities and fields have helped me to become someone that adapts quickly to new environments while staying focused on the tasks with the highest priority level. The time I've had living and working in major metropolitan areas of the United States and internationally, have made me a self-starter, capable of working on a team as efficiently and meticulously as I preform stand alone tasks. I believe a practical education has no end, and look forward to enhancing all of my professional skills, both in a company and as an individual.
